

Prototype reimplementaion of L^AT_EX 2_ε's role mapping

L^AT_EX Project, initial implementation Ulrike Fischer

v0.8d 2025-02-13

1 Introduction

This short file collects tag names from the L^AT_EX namespace and their role mapping used in the latex-lab files. The names and the roles are not necessarily the final ones!

Later settings of the same tag overwrite previous settings. The syntax of a line is a list of three strings ending with commas:

latex-tag, PDF-tag, name space,

The name space is normally pdf2 with the exception of the following PDF-tags which are only in pdf namespace: Art, BlockQuote, TOC, TOCI, Index, Private, Quote, Note, Reference, BibEntry, Code.

```
1 <*ns-latex-lab>
2 %% \ProvidesExplFile {tagpdf-ns-latex-lab.def} {2023-09-04} {0.8}
3 %% {latex} {https://www.latex-project.org/ns/lab/2022}{}
```

1.1 Role from tagpdf

The following tags are already set by tagpdf, so deleting here will not remove them.

```
4 title,          Title,    pdf2,
5 part,           Title,    pdf2,
```

Headings differ in article and book class. This here is for article:
